

Refrigerant Regulations

Fact Sheet 2

How can TMP help?

Our trained staff could come to your building in order to carry out an initial survey of what equipment you have on site, then discuss how the regulation changes would affect your building. TMP have a pool of certified engineers who are trained to carry out the works, and thus ensure as a company, you are compliant with the new regulations.

An example process on how TMP can assist the user to become compliant with the regulations

Come onto site to carry out an initial free survey of the site to assess what equipment falls within the regulations

Have an informal meeting with the client to discuss the assessment and prepare an action plan

Prepare and present a report to the client to include proposed timeframes and budgets

**Do not delay - Call our service department on 0208 676 0011
or email: enquiries@tmp-ltd.co.uk**
